(54) Title: METHOD OF STORING AND REPRODUCING CONTENTS

(57) Abstract: A method of storing and reproducing contents in a terminal capable of storing and outputting contents such as pictures or music is provided. When the terminal connects to a contents server and downloads contents from the contents server, it stores the downloaded contents along with its terminal identification information. When reproducing stored contents, the terminal compares terminal identification information attached to the contents with its terminal identification. If they are identical, the terminal reproduces the contents.
